Full job description

The SAP Contractor Consultant will be responsible for providing expertise and support in the implementation of SAP systems to build a Unified data model for Innovaccer. This role requires a deep

understanding of SAP modules, and integration processes, and the ability to manage, write ETL pipelines and

execute projects efficiently.

SAP Modules:

- **SAP FI/CO Modules:** Strong understanding of Financial Accounting (FI) and Controlling (CO)

modules, including general ledger, accounts payable/receivable, asset accounting, and cost center accounting.

- **SAP MM/SD Modules:** In-depth knowledge of Material Management (MM) and Sales and

Distribution (SD) modules, including procurement, inventory management, order processing, and

logistics.

- **Integration Knowledge:** Experience with integrating SAP finance and supply chain modules with

Objectives

- Implement and configure SAP modules, and backend tables to build UDM on cloud according to business needs.
- Provide technical and functional expertise to ensure successful SAP system integration.
- Optimize existing SAP systems for enhanced performance and user experience.

Technical Expertise:

- SAP FI/CO Modules: Strong understanding of Financial Accounting (FI) and Controlling (CO) modules, including general ledger, accounts payable/receivable, asset accounting, and cost center accounting.
- SAP MM/SD Modules: In-depth knowledge of Material Management (MM) and Sales and Distribution (SD) modules, including procurement, inventory management, order processing, and logistics.
- Integration Knowledge: Experience with integrating SAP finance and supply chain modules with other SAP modules like PP (Production Planning) and external systems.
- Able to write ETL queries to map SAP source to destination

Business Acumen:

- Financial Processes: Understanding of core financial processes such as budgeting, forecasting, financial reporting, and compliance.
- Supply Chain Processes: Knowledge of supply chain management processes, including procurement, logistics, inventory management, and demand planning.
- Industry Knowledge: Familiarity with industry-specific requirements and best practices in finance and supply chain management.

Project Management:

- Implementation Experience: Proven track record of successfully implementing SAP projects, including end-to-end lifecycle management from requirements gathering to go-live support.
- Methodologies: Proficiency in project management methodologies (e.g., Agile, Waterfall) and SAP ASAP (Accelerated SAP) methodology.
