Job Summary

Ingersoll Rand, a global leader in providing mission-critical industrial solutions, is seeking a talented Salesforce Administrator to join our dynamic team. This is your chance to play a pivotal role in the deployment and management of our Salesforce platform, supporting our commitment to continuous innovation and customer excellence.

We are looking for an experienced and proactive Salesforce Administrator, to drive user maturity and excellence in a large global organisation. The successful candidate will be responsible for day-to-day support, creating reports to drive improved business decision making, and improvement of our Salesforce user maturity. You'll work closely with cross-functional teams to ensure we are maximizing efficiency and capitalizing on the full features and benefits of Salesforce based on various business needs.

As a Salesforce Administrator with Ingersoll Rand, you will be at the heart of our operations, ensuring that our Salesforce environment runs smoothly and efficiently. You'll collaborate with cross-functional teams to develop and implement custom solutions that drive business growth and improve user experience. With your expertise, our Salesforce platform will not only meet the diverse needs of our global enterprise but also propel us toward new technological frontiers.

This new position will report into Digital Experience Manager and will work with a variety of global stakeholders across our Vacuum, Low Pressure, Transport and Engineered to Order businesses.

Responsibilities

- Create and manage reports, dashboards, and data analysis tools to support business insights
- Creating standard work to drive best practice
- Implement and configure Salesforce features such as workflows, validation rules, process automation, and custom objects
- Manage security settings: Oversee profiles, permission sets, roles, security settings data audits, deduplication, and cleanup to ensure data integrity and security
- Support end-users: Provide training, documentation, and resolve platform-related issues

- Collaborate with stakeholders to gather enhancement requirements and implement solutions to improve business processes
- Optimize the value of our tools, ensure seamless integrations, and identify any redundancy in features. Stay informed on new features by keeping up with platform releases and implementing them for continuous improvement
- Troubleshoot and resolve Salesforce-related issues, providing ongoing support to users and Assist with data migration, integrations, and overall system improvements

Basic Qualifications

- 2+ years of experience as a Salesforce Administrator.
- Salesforce Administrator Certification (ADM201) required; Advanced Administrator Certification is a plus.
- Strong understanding of Salesforce best practices and functionality with coaching and implementation experience
- Experience with Salesforce access management and object management is required
- Experience with data management, system integrations, and security settings.
- Excellent problem-solving skills and the ability to work independently or within a team.
- Strong communication skills and the ability to work with both technical and non-technical stakeholders
- Experience with Salesforce eCommerce Cloud, Salesforce CPQ, Field Service modules are a plus.
- Prior B2B experience is a plus
