About the job

Company Overview

At Motorola Solutions, we're guided by a shared purpose - helping people be their best in the moments that matter - and we live up to our purpose every day by solving for safer. Because people can only be their best when they not only feel safe, but are safe. We're solving for safer by building the best possible technologies across every part of our safety and security ecosystem. That's mission -critical communications devices and networks, AI-powered video security & access control and the ability to unite voice, video and data in a single command center view. We're solving for safer by connecting public safety agencies and enterprises, enabling the collaboration that's critical to connect those in need with those who can help. The work we do here matters.

Department Overview

Our IT organization has a critical role in driving extraordinary business results. Through a strong partnership with other areas of our business, we bring innovative thinking to every conversation and deliver with integrity. We're looking for people who bring great ideas and who make our partners' ideas better. Intellectually curious advisors (not order takers) who focus on outcomes to creatively solve business problems. People who not only embrace change, but who accelerate it.

Job Description

We are seeking a highly skilled Salesforce Developer with expertise in Lightning Web Components (LWC), Apex and Integrations to join our dynamic team. The ideal candidate will be responsible for developing and customizing Salesforce applications using the latest technologies to meet our business needs.

Key Responsibilities

- Design and develop high-quality, scalable, and efficient Salesforce solutions using Lightning Web Components (LWC) and Apex.
- Collaborate with Architects, analysts, and other team members to understand requirements and provide innovative solutions.
- Implement custom and out-of-the-box functionalities on the Salesforce platform.
- Ensure best practices are followed in design and development.
- Conduct code reviews and ensure adherence to coding standards.
- Troubleshoot and fix bugs in Salesforce applications.
- Stay updated with Salesforce releases and new features.
- Provide technical documentation and training to end-users.

Basic Requirements

- Bachelor's degree in Computer Science, Information Technology, or related field.
- 5+ years of experience in Salesforce development, including hands-on experience with Lightning Web Components.
- Proficient in Apex, LWC, JavaScript, HTML, and CSS.
- Strong understanding of Salesforce architecture and API.
- Experience with Salesforce integrations and data migration.
- Salesforce Developer Certification (Platform Developer I/II) preferred.
- Excellent problem-solving, communication, and teamwork skills.
